Gihan Bandara

Gihan Bandara (Master-GB)

Ongoing

TECHNICAL SKILLS

1.Programming Languages:

- Java • JavaScript • Kotlin
- Python • PHP • TypeScript(basic)

2.Frameworks & Libraries:

- React(vite, Next.js) • React Native
- Angular(basic) • Express.js
- Spring Boot(basic)

3.Databases:

- MySQL • MongoDB

4.Web Technologies:

- HTML • CSS • Node.js

5.Tools & Platforms:

- GitHub • Docker(basic) • Figma
- Postman • VS Code • Firebase
- Jira

SOFT SKILLS

- Problem-Solving
- Team Collaboration
- Adaptability & Continuous Learning
- Time Management
- Work Ethic & Responsibility

CERTIFICATIONS

- MongoDB Associate Atlas Administrator
- Postman Student Expert(Ongoing)

ACTIVITIES

- IEEE SLIITXtreme 3.0 - Hackathon Participant
- IEEE Pixel 1.0 - Technical Event Participant

ABOUT ME

Results-driven 3rd-year Software Engineering undergraduate with hands-on experience in web and mobile application development. Strong foundation in programming, databases, UI/UX design and project management. Actively seeking an internship or junior software engineering role to contribute to impactful projects while strengthening industry-level skills.

EDUCATION

G.C.E Advance Level Examination

2020

Mahasen National school

Passed-(Technology stream)

BSc (Hons) in Software Engineering

2023 - 2027

Sri Lanka Institute Of Information Technology

GPA: 3.58 / 4.0

PROJECTS(TOP 3)

HodaHitha.lk (Surplus Food Reduction and Redistribution System)

- Technologies: MERN stack, HTML, CSS, Google Map API, Socket.io-client
- A comprehensive full-stack web application to facilitate surplus food donations, connecting donors, operating managers, and organizations. The platform streamlines donation, donors, partners, and volunteer management, real-time communication, analytics, and reporting, aiming to reduce food waste and help communities in need.

UniVerse (Academic and Career Support Management system)

- Technologies: MERN stack, HTML, CSS, Gemini API
- A comprehensive Agile-based full-stack web application, that combines academic support tools(exam preparation, course management, guidance), career development tools (Resume Builder, Mock interview), mentorship, academic & career resources and session to give students a one-stop solution for personal and professional growth.

GreenPluse (Affordable & Clean Energy Platform)

- Technologies: React Native(Expo), Firebase(Authentication, Firestore database, and backend services), Google Map API, OCR
- A mobile application designed to alignment with UN Sustainable Development Goal 7. Users can Track clean energy generation, Convert generated energy into Coins, Donate Coins to the community, Use Credits to pay electricity bills, request help(renewable project) and Visualize real-world environmental & social impact.
