Gihan Bandara (Master-GB)

https://www.gihan-bandara.com

TECHNICAL SKILLS

1.Programming Languages:

- Java • JavaScript • Kotlin • C#
- Python • PHP • TypeScript
- HTML • CSS • C++

2.Frameworks & Libraries:

- React(vite, Next.js) • React Native
- Angular(basic) • Express.js
- Spring Boot(basic) • Tailwind CSS
- Node.js

3.Databases:

- MySQL • MongoDB • Supebase
- Firebase

4.Tools & Platforms:

- GitHub • Vercel • Render • Jira
- Postman • VS Code • Figma
- Android Studio • IntelliJ IDEA
- Railway • Unity Hub

5.DevOps:

- Docker • kubernetes • CI/CD

SOFT SKILLS

- Problem-Solving
- Team Collaboration
- Adaptability & Continuous Learning
- Time Management
- Work Ethic & Responsibility
- Communication Skills

CERTIFICATIONS

- MongoDB Associate Atlas Administrator
- Dean's List (2nd year 1st semester)

ABOUT ME

Results-driven 4th-year Software Engineering undergraduate with hands-on experience in web and mobile application development. Strong foundation in programming, databases, UI/UX design and project management. Actively seeking an internship or junior software engineering role to contribute to impactful projects while strengthening industry-level skills.

EDUCATION

G.C.E Advance Level Examination

2020

Mahasen National school

Passed-(Technology stream)

BSc (Hons) in Software Engineering

2023 - 2027

Sri Lanka Institute Of Information Technology

GPA: 3.58 / 4.0

PROJECTS(TOP 3)

SmartHealth (AI-Enabled Smart Healthcare Appointment & Telemedicine Platform)

- Technologies: Next.js, Spring Boot, Tailwind CSS, Supebase , Gemini API, Docker, Kubernetes
- A cloud-native platform built using Microservices Architecture. The system allows patients to book doctor appointments, attend video consultations, upload medical reports, receive digital prescriptions, and access AI-powered symptom analysis. It provides scalable, secure, and high-performance healthcare services for patients, doctors, and administrators.

RescueNet(Disaster Response & Emergency Coordination Platform)

- Technologies: MERN stack, CSS, Socket.io, Notify.lk, Cloudinary, Leaflet, Google Translate, Open-Mete
- Developed under UN SDG 11 - Sustainable Cities and Communities. It integrates real-time disaster intelligence, shelter management, SOS help requests, NGO coordination, routing, and missing person reporting into a unified system designed to improve disaster resilience and response efficiency.

GreenPluse (Affordable & Clean Energy Platform)

- Technologies: React Native(Expo), Firebase(Authentication, Firestore database, and backend services), Google Map API, OCR
- A mobile application designed to align with UN Sustainable Development Goal 7. Users can track clean energy generation, convert generated energy into coins, donate coins to the community, use credits to pay electricity bills, request help(renewable project) and visualize real-world environmental & social impact.

ACTIVITIES

- IEEE SLIITXtreme 3.0 - Hackathon Participant
- IEEE Pixel 1.0 - Technical Event Participant
